Summary — I'm a MERN Stack Developer who loves turning ideas into working web applications. I've learned most of my skills by building real projects—auth systems, dashboards, APIs, and fast, responsive UIs. I enjoy experimenting, debugging, and figuring out how things work behind the scenes. As a fresher, I'm excited to join a team where I can grow, take ownership of tasks, and contribute to projects that actually help users. I learn fast, stay curious, and always try to make every next project better than the last.

Skills

- **Frontend Skills** - React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap
- **Backend Skills** - Node.js, Express.js, MongoDB, REST APIs
- **Development Skills** - JWT Authentication, Role-Based Access, API Integration, JSON Handling, Responsive UI, State Management
- **Tools & Platforms** - Git, GitHub, Postman, VS Code, NPM, Vercel, Netlify
- **Soft Skills** - Problem Solving, Team Collaboration, Communication, Fast Learning, Time Management, Logical Thinking
- **Currently Learning** - Python, Data Structures & Algorithms
- **Language Proficiency** - English, Hindi

Experience

Eucoders Technologies Pvt. Ltd., Lucknow

Aug 2024 – Mar 2025

MERN Stack Developer (Fresher Role)

- Developed reusable React components and integrated REST APIs, improving UI performance and user experience.
- Collaborated with senior developers using Git and agile workflows, contributing to client projects with optimized state management.

Unifide Mentore Pvt. Ltd.

May 2024 – Aug 2024

MERN Stack Intern

- Built and optimized REST APIs with Node.js, Express.js, and MongoDB, improving response time via indexing and optimized queries.
- Worked on authentication workflows and role-based access, contributing to team MERN projects with version control.

Education

G.C.R.G Group of Institutions, AKTU

2025 – Present

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning

- Currently pursuing B.Tech in AIML with focus on programming, AI fundamentals, and modern software development.
- Actively working on practical projects and coding exercises to strengthen problem-solving and technical skills.

Government Polytechnic College, BTEUP

Jul 2022 – Jul 2025

Diploma in Computer Science & Engineering — 72%

- Completed Diploma with strong fundamentals in programming, databases, and web development basics.
- Participated in labs and project work, building interest in MERN stack and backend development.

Certification

Car Rental Full Stack Project (MERN)

- Developed a complete car rental platform with admin/user dashboards, 15+ REST APIs, JWT auth, and optimized MongoDB queries for improved performance.

Role-Based Authentication System (MERN)

- Built secure login/signup system with admin/user roles using JWT, bcrypt, and Express middleware, reducing unauthorized access by 90%.

AI Agents — Google ADK Kaggle

- Developed 4+ automation agents for workflow optimization, improving speed by 50% and reducing task failures by 30%.
